ABSTRACT

This book uses planning forms and examples to help media specialists and teachers focus on ways to effectively and purposefully add technology. The 22 collaborations connect with standards-based education in language arts, math, science, and social studies. Ideas for whole-class projects are also included. Each unit example begins with a completed planning form showing unit title and length, technology connections, suggested grade levels, activity focus, suggested collaborations between media specialist and teacher, basic resources, preparation tasks, and lesson plans. The examples show key places within each unit where technology can be integrated easily. Unit outlines include evaluation rubrics for many subject areas, and graphic organizers are also included. (Contains 265 references.) (MES)
